George Appliance

A photograph of a white, rectangular ceiling-mounted air conditioner unit. The unit has a large, white, slatted grille. It is installed in a modern office space. In the background, there is a large window with a view of a city skyline. A green plant is visible on the left side of the frame. A blue banner with white text is overlaid on the bottom right of the image.

Air Conditioners

Duct indoor unit

Applicable scenarios:

Bedrooms, Areas requiring aesthetic design

One of the most commonly used air conditioner indoor units. Embedded in the wall, hidden machine installation, more beautiful.

Wall-mounted unit

Applicable scenarios:

small areas such as bedrooms and small meeting rooms

One of the most commonly used air conditioner indoor units. Easy to install and takes up little area.

Ceiling indoor unit

Applicable scenarios:

Shopping malls, conference rooms, schools, hotel lobbies, hospitals, etc.

Suitable for areas with large spaces where you don't want to take up too much floor space. With exhaust vents in four directions, the temperature in the area can be quickly adjusted.

Cabinet Air Conditioner

Applicable scenarios:

Large areas such as lobbies, conference rooms, movie theaters, and restaurants.

This indoor unit is suitable for larger air conditioners, offering excellent cooling and heating capabilities, allowing for quick adjustment of indoor temperature.

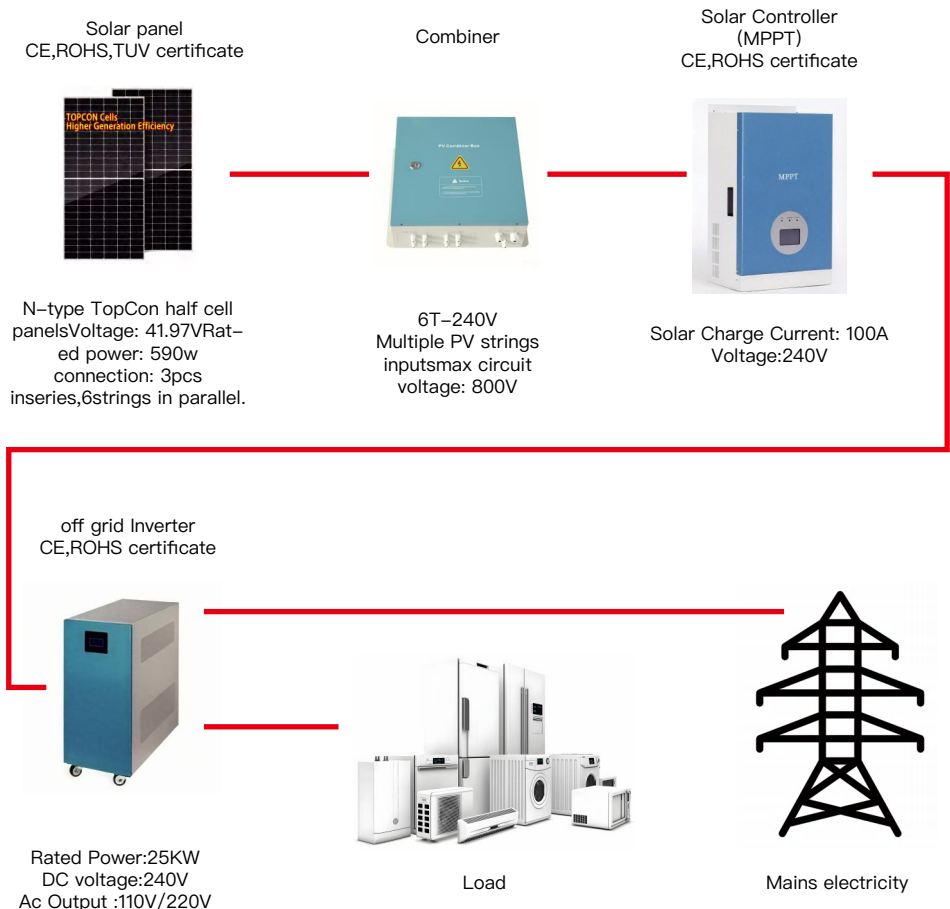

George Appliance

Solar System

Our solar system offers a clean, renewable, and cost-effective energy solution for residential, commercial, and off-grid applications. By converting sunlight directly into electricity, our advanced solar panel systems help reduce energy bills and carbon emissions. With options for grid-tied, hybrid, or off-grid configurations, our systems include high-efficiency panels, intelligent inverters, mounting structures, and optional battery storage. Built for long-term performance and minimal maintenance, these systems are ideal for homes, farms, factories, schools, and remote areas. Whether you are looking for a full solar energy solution or seeking reliable components for your own setup, we provide expert support and flexible packages to meet your needs.

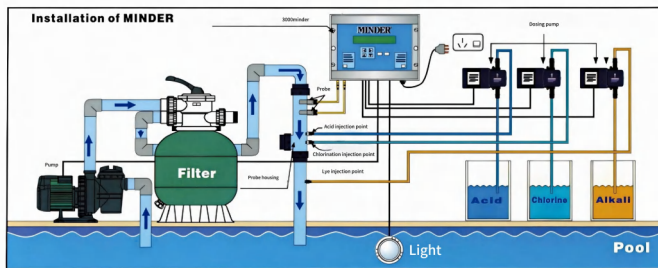

George Appliance

Swimming Pool Solutions

Our swimming pool equipment delivers everything you need to maintain clean, safe, and inviting pool water for residential or commercial use. From high-performance pumps and advanced filtration systems to heating units, LED lighting, and robotic cleaners, our comprehensive product range supports efficient pool operation and water management. Designed with durability, energy savings, and user convenience in mind, our equipment is ideal for homes, hotels, gyms, and resorts. With professional support and customization options available, we help you create the perfect pool experience for every season.

Diesel Generators

Diesel Generators

Diesel generators provide a dependable and efficient source of power for a wide range of applications, from residential backup to industrial operations. With power outputs ranging from 5kW to 1000kW, our generators are equipped with trusted engines like Cummins and Perkins, ensuring reliable performance and fuel efficiency. Designed for harsh environments and extended use, these generators are available in silent, trailer-mounted, and automatic-start models to suit different needs. Whether you are dealing with frequent outages or powering remote job sites, our diesel generators offer a cost-effective solution with easy operation, long lifespan, and minimal maintenance.

Elevators

Elevator Solutions

Elevator design plays a crucial role in both the functionality and visual impact of modern buildings. Our elevator solutions combine advanced engineering, safety standards, and aesthetic customization to meet the diverse needs of residential, commercial, and public infrastructure projects. Whether you require passenger elevators, panoramic glass lifts, hospital elevators, or freight lifts, we offer tailored designs that optimize space, improve energy efficiency, and enhance user comfort. With options for machine room or machine room-less configurations, smart control systems, and luxury interior finishes, our elevators integrate seamlessly with architectural style while ensuring smooth and secure operation. Backed by professional technical support and global installation experience, we deliver elevator design solutions that balance innovation, performance, and elegance.
