PROJECT CASE

01

500m² of minimalist home, pure high-class beauty.

In the modern era of information technology, the concept of reducing complexity to simplicity is particularly important, redundant knowledge is like unnecessary decoration, just cumbersome, return to simplicity in order to explore the essence behind.

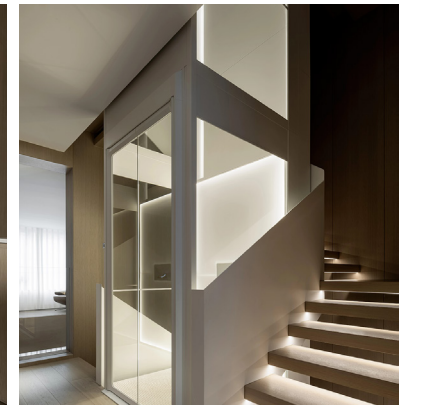

02

Quality light is spread across the wall panels, bringing a more ceremonial feel to the space and mood.

03

Accompanied by the natural atmosphere emanating from the logs, breaking the hardness of the straight lines, the sense of spatial order is no longer rigid.

04

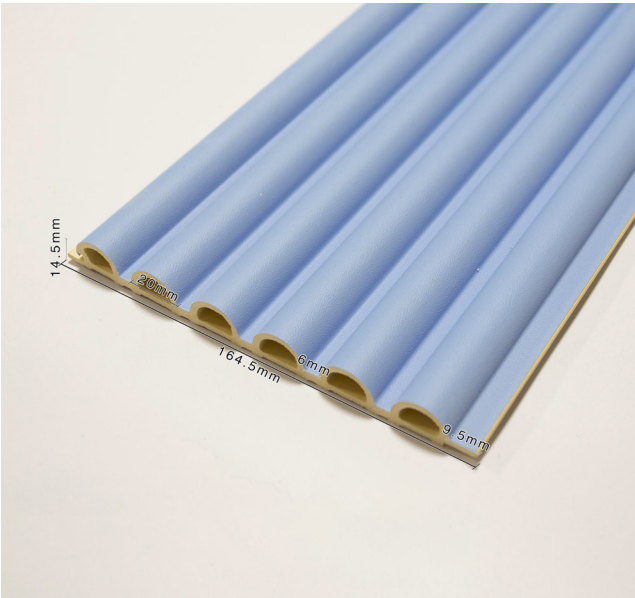

The log grain incorporated in the modern minimalist style adds a more exciting component to the space.

Advanced surface processing technology shows the texture of natural stone to the greatest extent. Compared with traditional stone, it has the characteristics of lighter weight, more choice of lines and more convenient installation.

Explore more possibilities of WPC wall panels together.

WALL PANEL

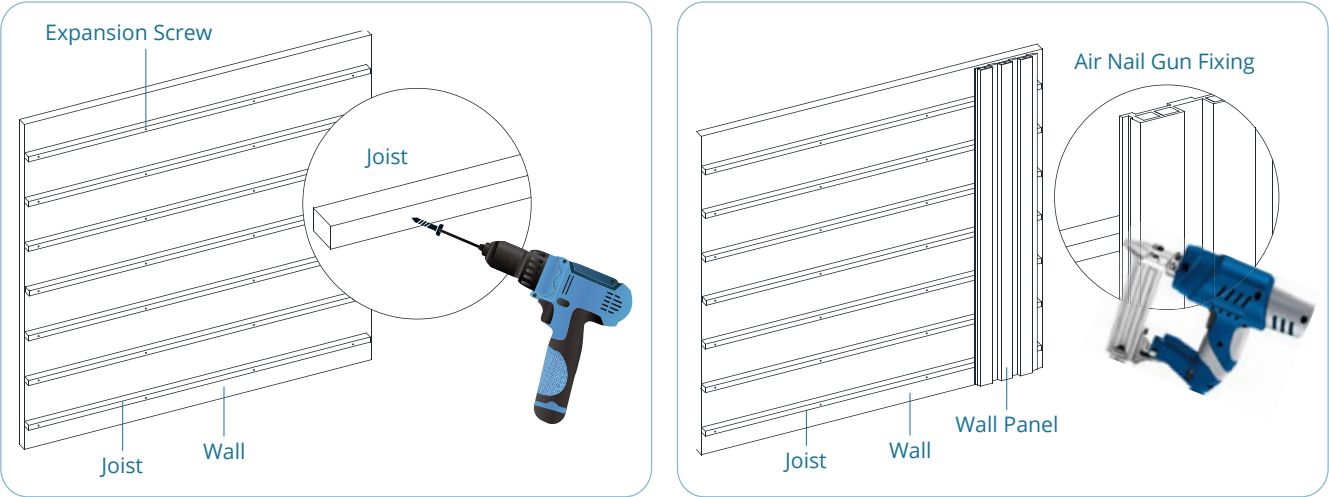

Indoor WPC wall panels can not only be used for indoor internal wall decoration but also for the ceiling.

MAIN COMPONENTS

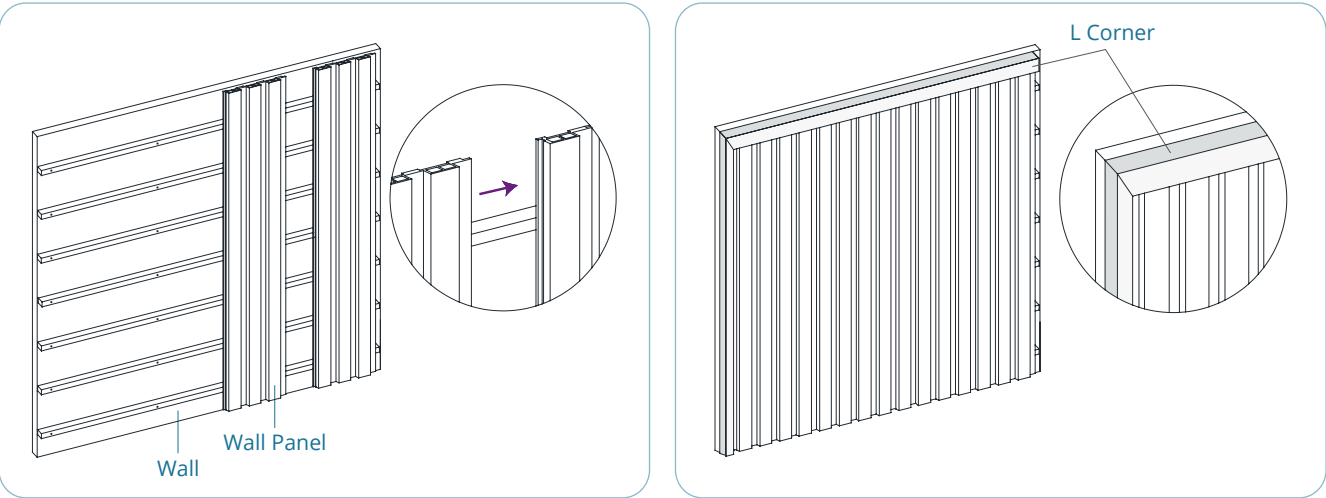

WALL PANEL INSTALLATION GUIDE

- 1 Fix the solid wood strip to the wall with screws with a joist spacing being 35cm.
- 2 Install the first wall panel and fix it with nails.

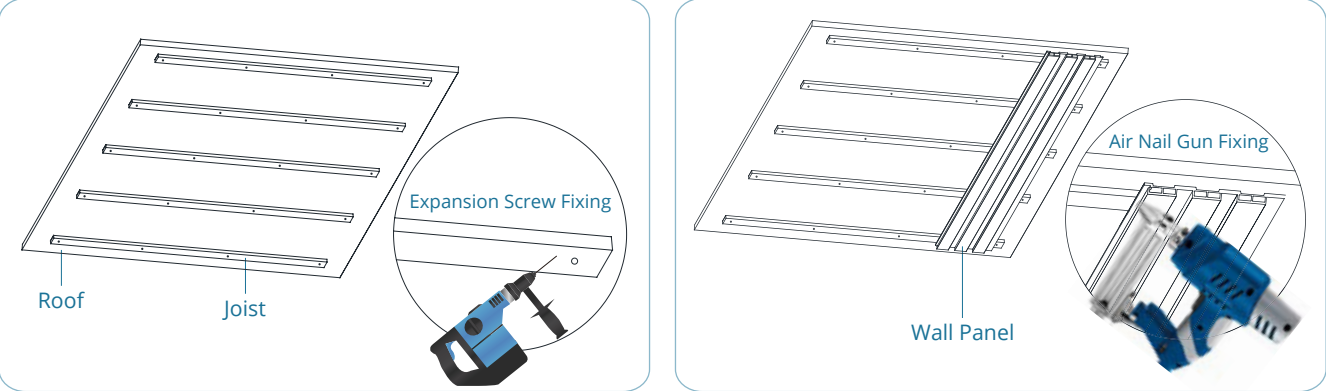

- 3 Install the second wall panel, then connect and fix them with nails.
- 4 Install the L corner.

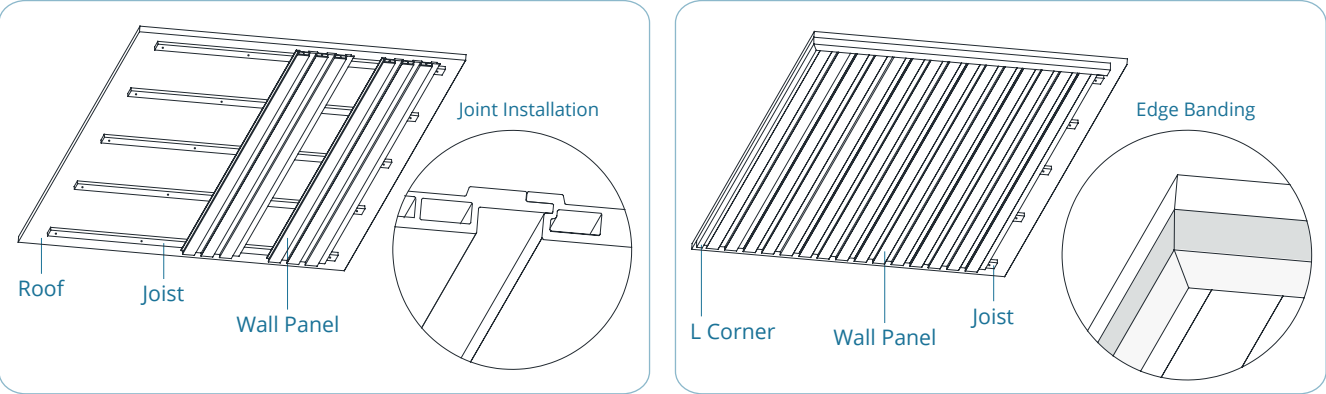

CEILING INSTALLATION GUIDE

- 1 Fix the joist on the roof with screws.
- 2 Install the first ceiling panel and fix it with nails.

- 3 Wall panels need to be split jointed at the chute sequentially and fixed with screws.
- 4 Install the L corner.

DESIGN

Dome profile slats on the walls create a distinctive linear texture for each project.

INSTALLATION INSTRUCTION

CEILING

Indoor wpc ceiling panels can be installed either with or without hangers. Choose the hanger with suitable length so that you get a preferable height of the ceiling!

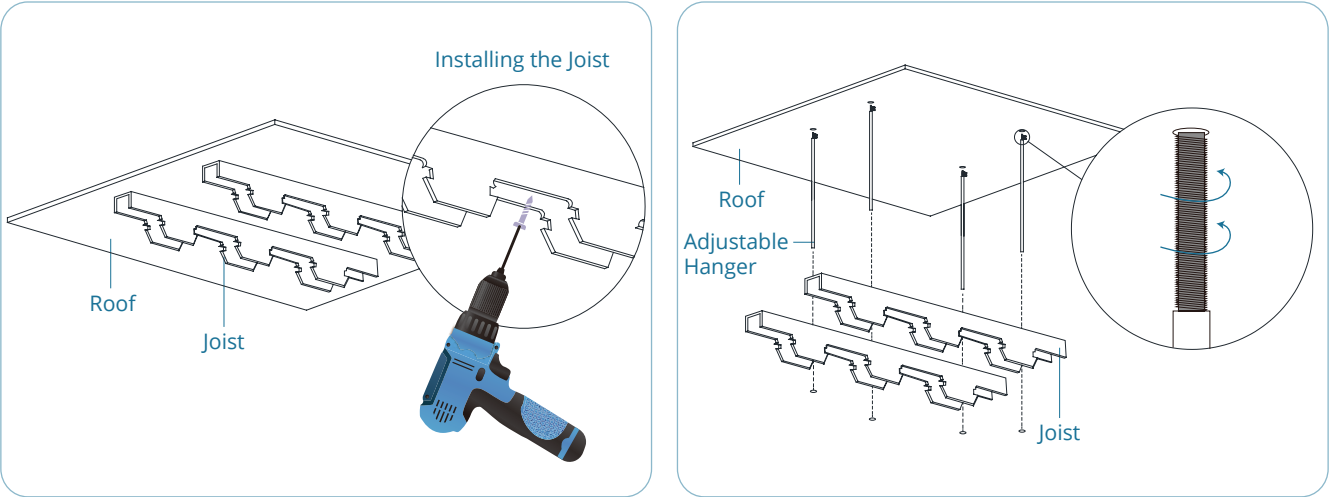

MAIN COMPONENTS

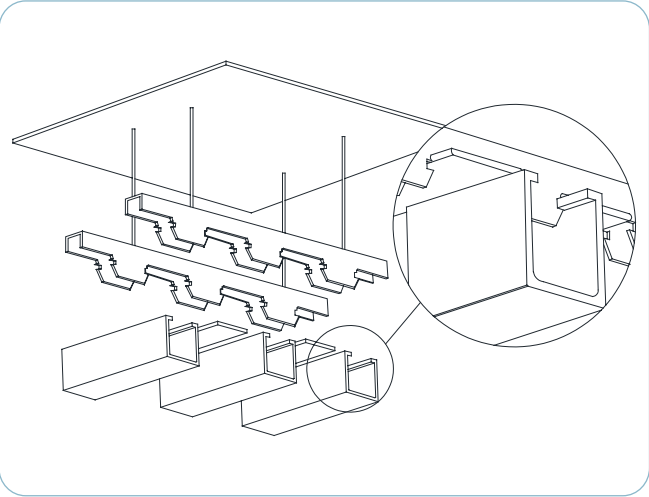

INDOOR CEILING INSTALLATION

1 Fix the joist to the ceiling with screws if you prefer not to use hangers.

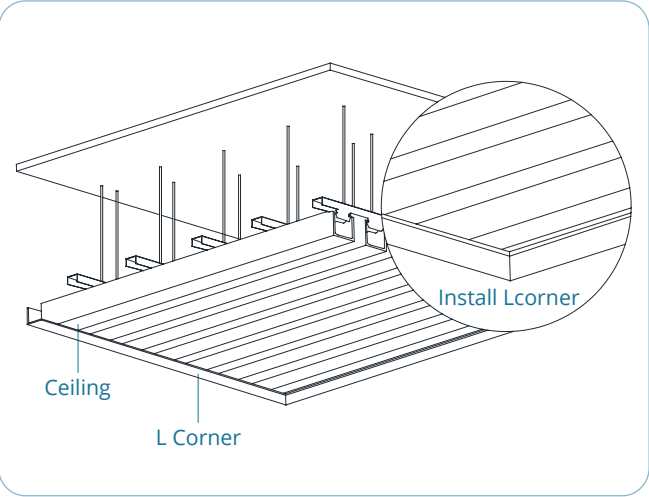

If you prefer to use hangers for the installation, please fix the hanger to the ceiling first.

2 Connect the ceiling panels to the joists.

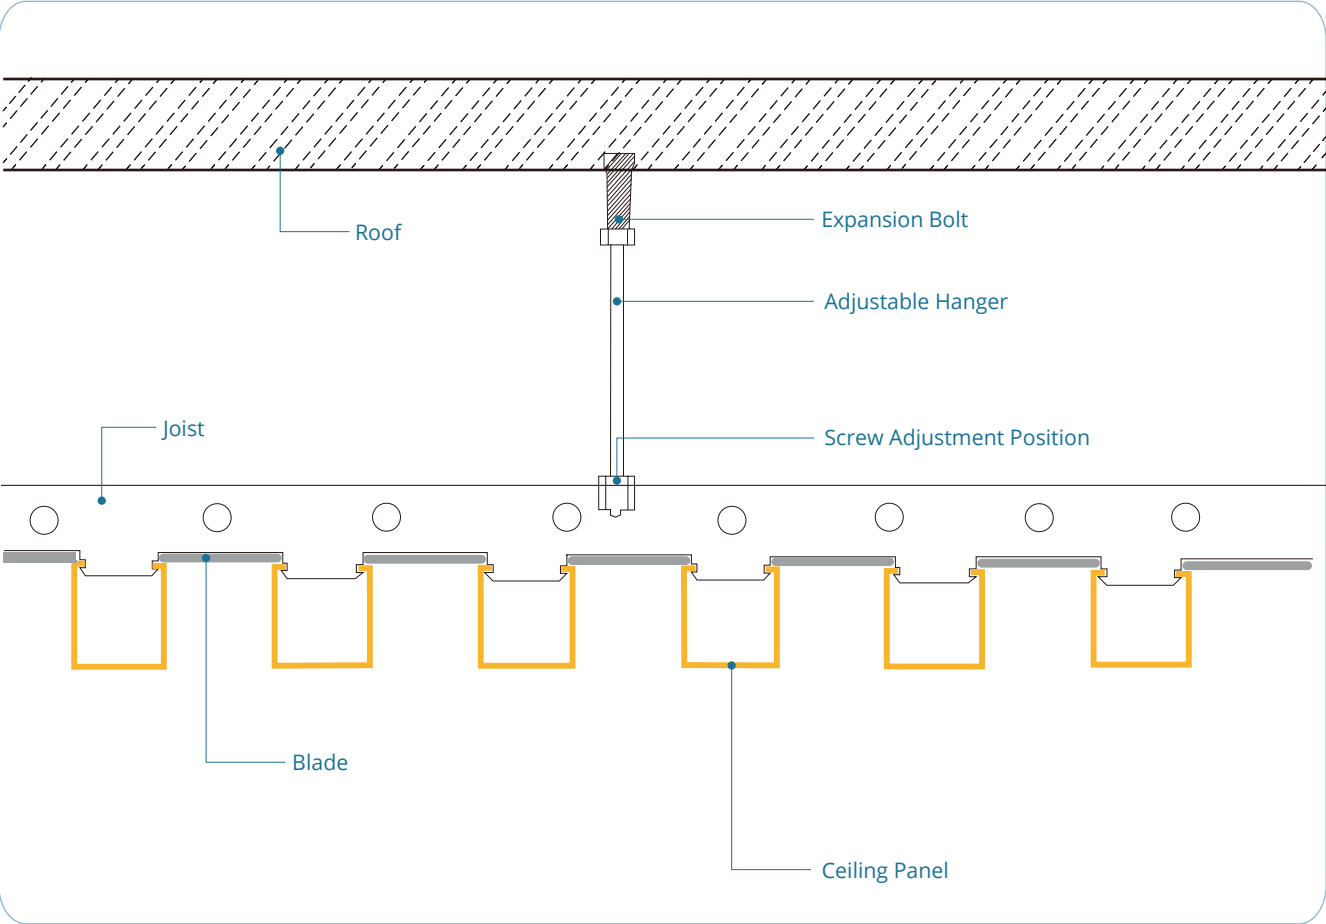

3 Install the L corner.

CONSTRUCTION DETAIL DRAWING

Ceiling Installation Cross-sectional Schematic Diagram

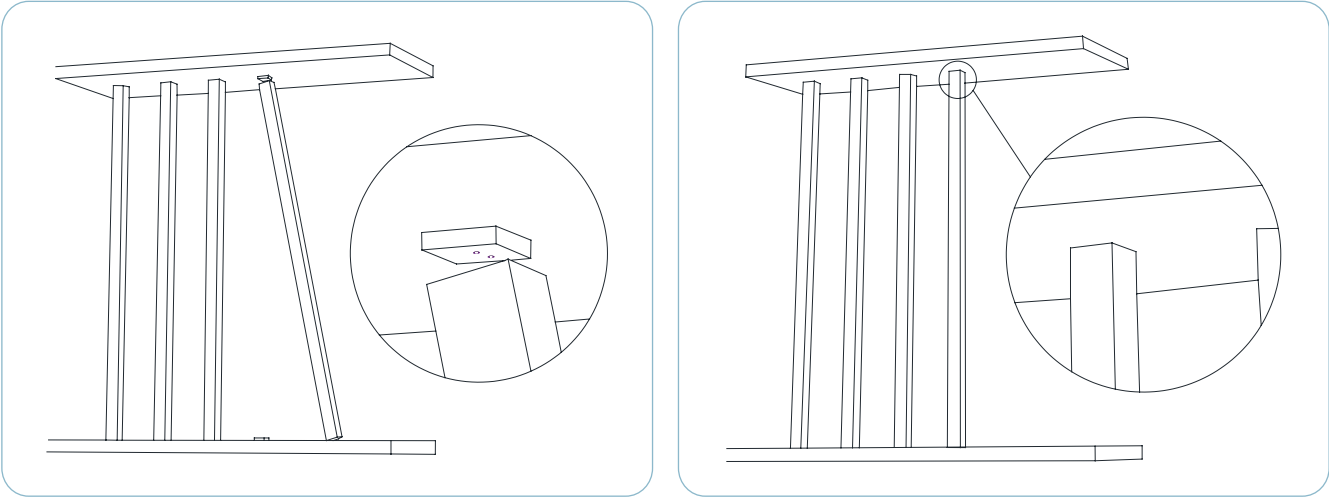

TUBE

MAIN COMPONENTS

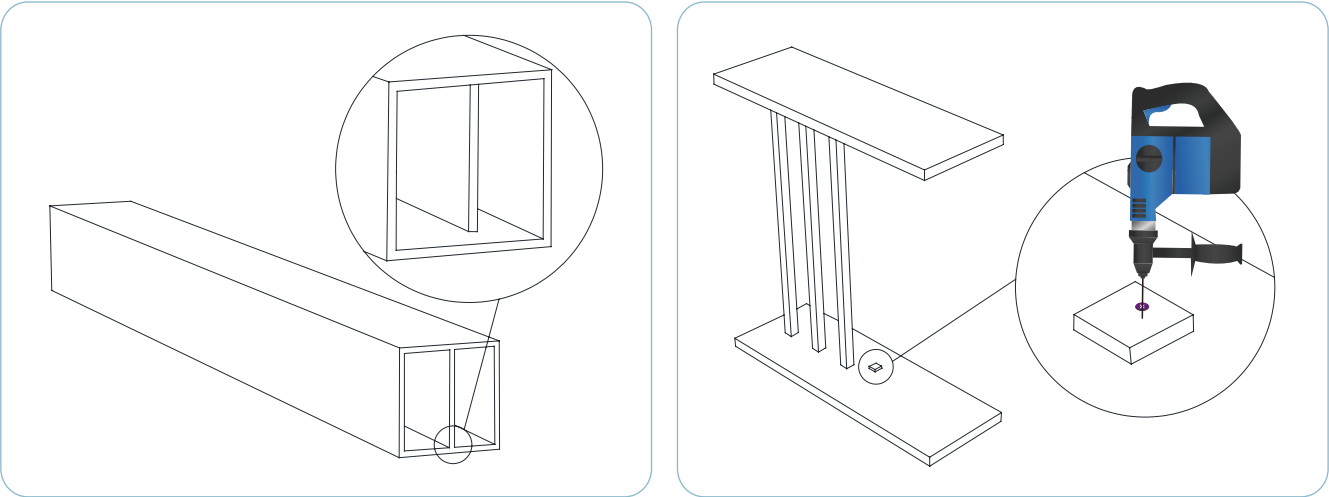

- 3 Insert the timer tube into the small wooden block obliquely, then debug it from the left and right sides of the wall, and insert the other end into the small wooden block.
- 4 Fix the small wooden blocks with expansion screws at the corresponding places on the ground and the roof.

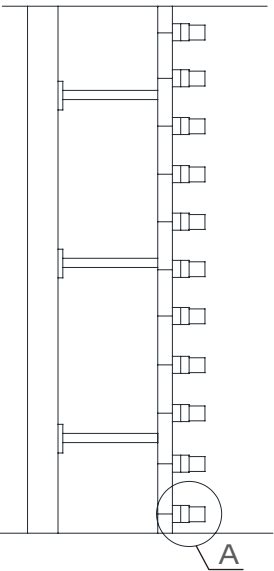

INDOOR TIMBER TUBE INSTALLATION

INDOOR TIMBER TUBE INSTALLATION

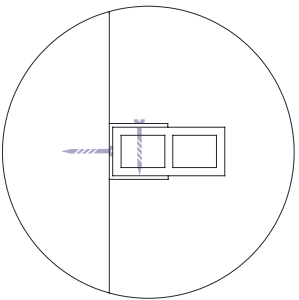

- 1 If there is a beam inside the timber tube, it is necessary to hollow out a part of the reinforcing beams at both ends.
- 2 Fix the small wooden blocks with expansion screws at the corresponding places on the ground and the roof.
